

ORIGINAL PARTS

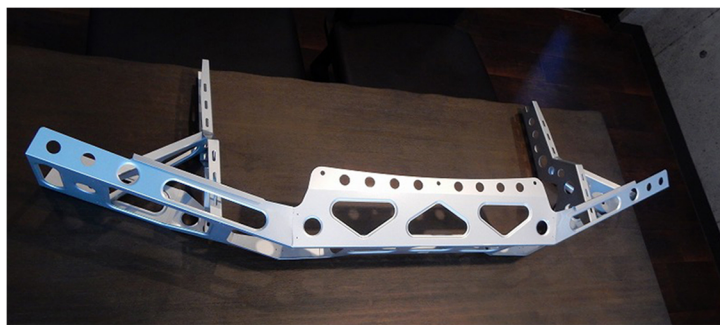

Inner reinforcement

List price 76,700- yen Tax included / mounting cost / painting needs extra cost

Painting cost 15,000- yen excluded the genuine color

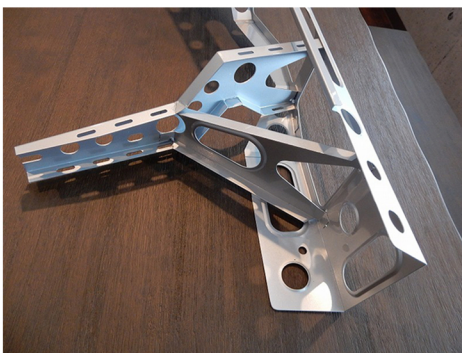

Lightweight inner reinforcement

Our original reinforcement is saved its weight by punching the positions which don't affect its rigidity as keeping the same shape as the genuine shape
The weight is 2.7kg lighter than the genuine part which weight is 6kg + a

【Mounting Method】

Because of the same shape, it is attachable with bumper face, mounting clip and number plate bracket. Even your R32 cars have NISMO, it is still installable without problems.

【Notes】

The clip located upper part of bumper is sometimes hard to install because of its thinness so please install while fixing the panel.

The screw and nut holes are made a little bigger so please install while checking the location.

The genuine reinforcement has fixing brackets and rubbers. If you would like to install the same as the genuine, please fix it as using slotted holes.

Unpainted product's color is black surface.

The delivery date would be around a month if there is no stock.

The design and weight may be slightly changed for improvement.
